

Atra.

Tilia

Award-Winning Design.

Armchair ATRA was deemed worthy of three prestigious awards such as the German Design Award 2021 for the category of excellent product designgarden and outdoor living with "Democratic Design" title, iF Design Award 2020 for the category of creative design and Plus X 2020 Design Award."

designed by

Kunter Sekercioğlu

Ecologic.

Produced from 100% recyclable polypropylene and fiberglass material, Atra proves the value it gives to the world with not only design features also with its material. Thanks to its two-piece structure, it can be easily renewed by the user. The changeable seating area is not just a design element for us; it is a reflection of our universal design principles.

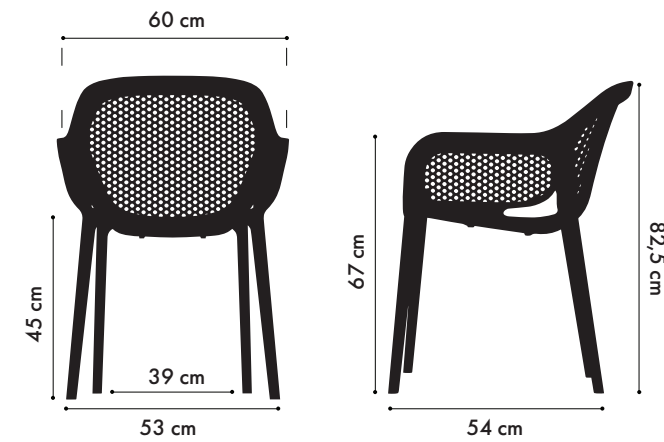

Functional.

Designed to be used indoors and outdoors, the ventilated seating part of the Atra armchair was considered for spacious use. Stackable when required, the Atra is resistant to outdoor weather conditions and is easy to clean.

Atra.

We present you the Atra armchair with a brand new approach in which we consider honest production, accessible design, and sustainable material. Atra, designed by Kilit Taşı Design Founder Kunter Şekercioğlu, brings together Tilia's honest production principles, sustainable material, and the desire to be accessible for everyone in a single chair.

Ergonomic.

With its soft texture and wide curved form surrounding the body, the Atra armchair offers an ergonomic sitting pleasure with its breathing perforated seating area.

Democratic Design.

With luxury design and the realization of our goal of making quality available to everyone, Atrá's seat part is detachable so that the part that is most used and more likely to wear out in time is replaceable and recyclable.
